

Automatic Garage Door Deadbolt SD
by Steel-Line

Automatic garage locking system for your Garage Door

A heavy-duty locking bolt that automatically engages when you close your garage door

Automatic Garage Door Deadbolt SD by Steel-Line

Door Types: Double or Single Sectional Garage Doors

Make your garage the best place to store your valuable belongings.

Your garage door is the largest entrance in your home containing important items like cars, bikes and sports equipment. This is why we recommend a Automatic Garage Door Deadbolt SD by Steel-Line. Like a deadbolt on your front door our lock will lock your garage door automatically when closed.

How It Works

The Automatic Garage Door Deadbolt SD by Steel-Line has been designed using advanced technology and will automatically engage when you close your door using your remote control.

The locking pin extends when the door reaches the closed position, providing an additional lock to your garage door.

When opening, the locking pin will automatically retract, disengaging the deadbolt and allowing the door to raise to position.

Key Features

Set and forget. No regular charging or battery changing requirement

High quality, slim, attractive aesthetic enhances its sophisticated design

Effortless installation and integration with the Steel-Line SD motor range, with Marantec option available

Simple disengagement in the event of power failure

Engineered with the latest electronic technology

Hard-wired so no interference commonly experienced with other locks on the market

NOTE: Compatible with double or single sectional garage doors.
